AN ADVENTURE WITH A TWIST

Spike McFang, a young vampire on the go, can work magic with his cape and hat. When Spike does a 360, the cape spins around him and knocks out approaching enemies. When he tosses his hat, this flashy fashion statement turns into a powerful boomerang which plows down everything in its path, then it returns and lands on his head. As our story opens, Spike is traveling to Fighter Island with his friend and mentor **Professor Steam** in order to learn how to improve his fighting techniques. Little does Spike know that he will soon be using those techniques to save his kingdom. Spike's

father, **Dracuman**, is one of the three leaders of the islands of **Vladamasco**. The other two leaders are **Vampra** and **General Von Hesler**. It seems that Von Hesler has kidnapped the other island leaders and claimed the land as his own. With the help of **Camelia**, Vampra's daughter, and **Rudy**, Von Hesler's son, Spike must put an end to the evil forces that have taken over the land and rescue the kingdom's kind-hearted leaders.

GETTING READY

Insert the **Twisted Tales of Spike McFang** game pak into your Super NES and turn the power switch on. The title screen will appear and, after a few moments, the story of the game will be presented. Press any

button to return to the title screen, then press the Start Button to turn to the journal screen.

When the journal screen appears, you have the option to open one of the three game files, copy a

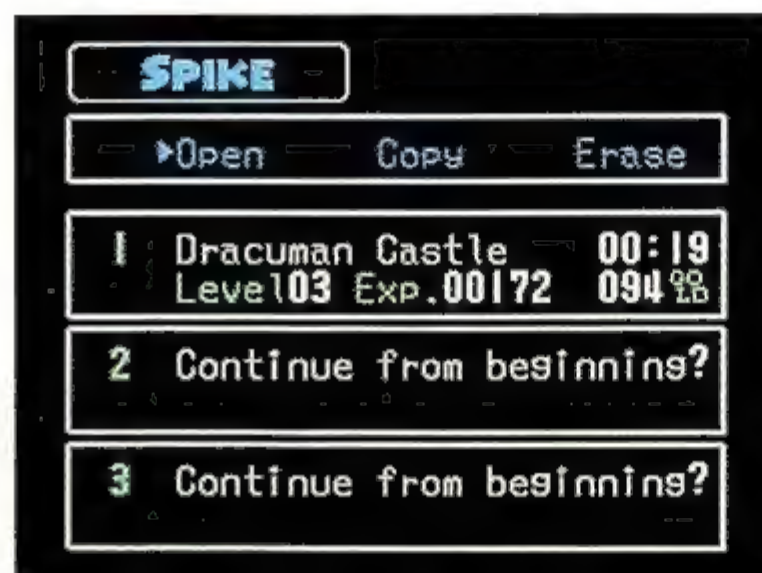

game file to one of the other two spaces or erase a game file. To begin game play, move the cursor so that it points to the word "open", then press the A Button. To start a new game, select an empty file and press the A Button again. If you wish to return to a saved game, select the file of the game you want to return to and press the A Button.

SAVING THE GAME

The game pak is equipped with a battery which allows you to save your progress as you make your way through the game. As you guide Spike through his long quest, you will occasionally see a stone-

headed character with a big book. Position Spike close to this character and press the Y Button. He will ask you if you want to save your progress. Make sure that the cursor is

pointing to the word "yes," then press the Y Button again. The character will update your current game file. You may then turn the Super NES off and store the game pak.

NOTE: If Spike runs out of energy, you can continue your game from the last place you saved your progress. It's a good idea to record your journey frequently!

ADVENTURING ADVICE

Here are a few things to keep in mind as you guide Spike through this challenging journey.

GOLD AND EXPERIENCE ARE KEY

It's a good idea to knock out as many enemies as you can in the early stages. The experience points and gold that Spike earns will help build his abilities so that he will be ready to take on the challenges of the advanced areas.

SAVE CARDS FOR BIG BATTLES

While some of the cards that Spike accumulates can only be used while facing weak enemies, many cards have powers that will help in his battles with the most powerful creatures of the kingdom. Save these cards and use them against enemy bosses.

KNOW YOUR ENEMY'S STRENGTH

Some enemies in advanced stages will get the better of Spike if he's not strong enough to fight them. You may want to build up Spike's levels before taking on stronger enemies.
